

PRAGATHESWARAN A

Enthusiastic engineering student with a strong foundation in Engineering Drawing, Strength of Materials, and Robotics. Skilled in technical drawing interpretation, material behavior analysis, and applying mechanical principles to robotic systems. Passionate about hands-on learning, problem-solving, and developing efficient mechanical and robotic solutions.

EDUCATION

B.E.Mechatronics Engineering

Kongu Engineering College (Autonomous),

2023–2027 | CGPA: 7.86

XII Standard – Lingannamani Matriculation Higher Secondary School, 2022–2023 | 87.33%

X Standard – Lingannamani Matriculation Higher Secondary School, 2020–2021

SKILLS

3D Modelling | PCB Design And Fabrication |
HTML | CSS | JavaScript | Mongo DB | MySQL |
React.js | Node.js

TOOLS & SOFTWARE

SolidWorks | Auto CAD | Eagle | Copper CAM |
Docker | Jenkins

AREAS OF INTEREST

- Engineering Drawing
- Strength of Materials
- Robotics

PROJECT

Smart Door Bell System with Notification

- A Smart Door bell system is an IoT- based device that alert with notification to the homeowner when someone approaches near the door
- Designed and implemented an IoT-based smart doorbell system that sends real-time notifications to the homeowner when motion or a visitor is detected near the door, enabling remote monitoring and improved home security.

Vision-Based Inspection System using Raspberry Pi

Developed an automated inspection system using Raspberry Pi 3, 5MP camera, and Python to detect object defects by analyzing dimensions, edges, and surface quality. Integrated IR sensor, 4-channel relay module, linear actuator, and indicator system to automate door control, object detection, and real-time status indication (OK/Reject).

- Designed and modelled a custom acrylic enclosure in SolidWorks, including component mounting, airflow management (exhaust fan), and hardware integration for industrial-style continuous operation.

CREDIT COURSES

- PCB Designing
- PCB Fabrication

CERTIFICATIONS

- Autodesk Certified User – AutoCAD (May 2025)
- CSWA – Solidworks Associate (Sep 2025)
- Prompt Engineering – Neural Gen-AI Networks (Oct 2025)
- NPTEL (IIT Roorkee): Fundamentals of Object-Oriented Programming – *Elite Certificate* (Apr 2025)

EXTRACURRICULAR ACTIVITIES

- Active NSS member, organizing social awareness campaigns and community service(2024–2026)
- Attended workshops on web development and software tools, actively contributing to peer learning

LANGUAGES

English | Tamil | Kannada
